

THE RUSSIAN SOCIETY OF INTERVENTIONAL CARDIO-ANGIOLOGY OFFICIAL EVENTS PROGRAM FOR TREC 2020

HALL «PUSHKIN 2»

JANUARY 24

13:00 – 14:00 SATELLITE SYMPOSIUM OF SIEMENS HEALTHINEERS «OPTIMIZATION OF WORK PROCESS AND IMAGING TECHNIQUES IN A MODERN ANGIOGRAPHIC OPERATING THEATRE»

Moderators: A. Babunashvili, V. Demin, E. Sharabrin

13:00 – 13:20 V. Demin

Integration of equipment and imaging techniques in new operating theatres with Artis Q.zen

13:20 – 13:35 B. Sharafutdinov

Embolization of uterine arteries and the prostate on Artis Q angiographic complex

13:35 – 13:50 A. Kapralov

Capabilities of last generation angiographic imaging technology in lowering radiation exposure and amount of injected contrast

13:50 – 13:55 S. Papojan

Description of a clinical case with implementation of Fusion Image technology

13:55 – 14:00 Concluding remark – A. Babunashvili

14:00 – 16:00 Break

16:00 – 18:30 Scientific-practical session «Treatment of complex bifurcation lesion: from simple to complex» in collaboration with PCR NextGen and AMIRES

16:00 – 17:30 – Theoretical part

Chairs: Piera Capranzano, Pierre Deharo, A. Prokhorikhin

Experts: Z. Shugushev, E. Kretov, S. Volkov, A. Biryukov

17:30 – 18:30 – Practical part (simulation session)

Moderators: A. Prokhorikhin, Z. Shugushev, S. Volkov, E. Kretov, V. Maiskov, A. Viller

Learning objectives:

During the course of the Seminar participants will get familiar with theoretical and practical aspects of bifurcation lesion treatment including cases with left main coronary artery involvement. Technical details of the procedure in different clinical scenarios will also be discussed. Using a simulator, participants will be able to practice various techniques of bifurcation stenting.

Target audience: specialists with work experience of less than 5 years.

The main idea is to involve young specialists in discussions with session chairs and other participants. Experts will only intervene to initiate conversation or during discussion of complex cases.

Aim: maximum engagement and freedom of opinions without pressure from expert viewpoints.

Practical part

Simulation session:

During the simulation session a group of 30 individuals will be divided into 5 smaller groups each working with its' own moderator. Two methods of bifurcation stenting will be explored, for example, TAP and Culotte techniques etc.

JANUARY 25

11:45 – 13:00 Discussion session at the «discussion club» of Russian Society of Interventional Cardioangiology

lessons learned from EXCEL: what should be taken into account and will the management of myocardial revascularization change in the near future?

Chair: A. Babunashvili

Experts: V. Kaleda, A. Okhotin, D. Dundua, Z. Shugushev

Invited experts: S. Pancholy, S. Kedev

13:00 – 14:00 Break

14:00 – 16:00 Presentation of accepted abstracts and clinical cases

Moderators: A. Babunashvili, V. Demin, D. Kandyba, S. Volkov, B. Gegenava, E. Sharabrin, D. Maximkin

14:00 – 14:15 V. Artemijev

Distal radial access in tall patients: routine practice

14:15 – 14:30 G. Sazanov

Effect of pre-dilatation on frequency of no reflow/slow flow phenomenon occurrence

14:30 – 14:45 A. Bazunov

Endovascular treatment of a patient with "nutcracker syndrome" following left renal vein transposition (clinical case description)

14:45 – 15:00 V. Gostimskiy

Thromboextraction from left middle cerebral artery due to coagulopathy developing a month after a stroke and thromboextraction from ipsilateral side (clinical case description)

15:00 – 15:15 V. Maiskov

Acute myocardial infarction in young people: a change of paradigm

15:15 – 15:30 I. Arslanbekov

Adverse situation during left anterior descending artery ostium stenting in a patient with STEMI (clinical case description)

15:30 – 15:45 P. Vartanov

Stenting of ACS patients with comorbid diabetes mellitus and diffuse coronary artery disease

15:45 – 16:00 Concluding discussion

16:00 – 16:15 Coffee Break

16:15 – 18:00 Session «Complex cases of endovascular interventions. Interesting decisions for successful outcomes»

Moderators: S. Semitko, D. Kandyba, S. Volkov, E. Sharabrin, R. Dautov. Yu. Matchin, V. Derkach

16:15 – 16:30 N. Marukjan

Left main compression by dilated pulmonary artery in a patient with PAPVC and ASD

16:30 – 16:45 B. Gegenava

Embolization of dural arteriovenous fistula using distal transradial access

16:45 – 17:00 S. Shenderov

Successful reperfusion therapy in acute ischemic stroke using transradial access

17:00 – 17:15 A. Dubaev

Provisional bifurcation stenting in treatment of left main in-stent restenosis

17:15 – 17:30 B. Sharafutdinov

Transradial approach in endovascular treatment of acute ischemic stroke

17:30 – 17:45 D. Ovcharenko

Type 2 endoleak embolization using transvenous access after endograft implantation

17:45 – 18:00 Concluding discussion
